PRODUCT SPECIFICATION SHEET
International trade, sourcing and procurement

Primary Aluminium Ingots

Grades A7 and A8

	A7	A8
Purity	Minimum 99.70% Al	Minimum 99.80% Al
Type	Primary / virgin aluminium; non-recycled requirement subject to supplier and documentation verification	
Form	Standard ingot, T-ingot or sow, depending on availability	
Origin	Stated in each offer	
Delivery	CIF or another Incoterm agreed by the parties	
Inspection	SGS or another mutually accepted independent inspector	
Documentation	COA, certificate of origin and shipping documents	
Availability	Availability upon request	

Exact chemistry, applicable standard and purity are confirmed through the supplier's technical specification and Certificate of Analysis for each transaction. Grade names such as A7 and A8 are not assumed to be equivalent to other designations (for example P1020 or P0610) without that confirmation.
